Subject Index of Volume 60

Acetic acid
  and chloroacetic acids; primary step in photochemical degradation of, on TiO_2 photocatalyst, 295
Acetylene
  hydrogenation of, over various Group VIII metals: effect of particle size and carbonaceous deposits, 99
Acyclic acid
  and cyclic urea formation via Co-catalysed oxidative carbonylation of aromatic primary amines, 41
Adsorption
  $Mo(CO)_6$, on chromia–silica catalyst: formation of hetero-adduct metal complexes, 71
Alcohols
  Cu-catalysed dehydroamination of 1-hexanol with dimethylamine: *in situ* FTIR study, 399
  Diels–Alder additions of 1,3-dienes to propargylic alcohols catalysed by Wilkinson's catalyst, 59
  inverse phase-transfer effect of cyclodextrins: oxidation reaction of benzyl alcohols by NaClO aqueous solution, L13
  kinetic resolution of 1,2-diols by baker's yeast oxidation, L33
  oxidation and dehydrogenation of, by glauconite, a natural Fe(II)- and Fe(III)-containing sheet silicate, and ferrisepiolite, its molecular sieve analogue, 109
  Pd(0)-catalysed carboxylative cyclized coupling of propargylic alcohol with aryl halides, L1
  selectivity dependence on acidity of Cu–alumina catalysts in dehydrogenation of cyclohexanol, L23
  shape-selective mordenite-catalysed amination of ethanolamine to ethylenediamine, 11
Alkenes, Olefins
  allylic and vinylic carbonylation of cyclohexene catalysed by [Ru^{II}(EDTA−H)(CO)], 275
  deuterioformylation of (*E*)-2-butene and protioformylation of (*E*)-1,1,1-$^2H_3$-2-butene with Co, Rh and Pt catalysts, 363
  Diels–Alder additions of 1,3-dienes to propargylic alcohols catalysed by Wilkinson's catalyst, 59
  hydroiminoformylation of, with isocyanides and H in presence of Ru complex catalysts, L5
  metal carbonyl catalysed reductive carbonylation of substituted nitrobenzenes in presence of, as solvents, 155
  organotitanium chemistry: substituent effects on isomerization of 1,5-hexadiene catalysed by ring-substituted titanocene hydride, 19
  reaction behaviour in metathesis of, with alkyl-substituted vinylene structure over $CsNO_3$–Re_2O_7–Al_2O_3 catalyst, 209
  shape-selective mordenite-catalysed amination of ethanolamine to ethylenediamine, 11
Alkynes
  hydrogenation of acetylene over various Group VIII metals: effect of particle size and carbonaceous deposits, 99
  oligomerization of, by $RhCl_2$–Aliquat 366 catalyst system:
    formation of benzene derivatives, 313
    formation of 2,3-disubstituted 1-phenylnaphthalenes by cyclodimerization of phenylalkynes, 323
Aluminium
  influence of carrier (Al_2O_3 and SiO_2) calcination temperature on physicochemical and catalytic properties of supported Ti complexes, 221
  Raman spectra of Cr oxide species in CrO_3/Al_2O_3 catalysts, 83
  reaction behaviour in metathesis of alkenes with alkyl-substituted vinylene structure over $CsNO_3$–Re_2O_7–Al_2O_3 catalyst, 209
  selectivity dependence on acidity of Cu–alumina catalysts in dehydrogenation of cyclohexanol, L23

Amines
aromatic primary; acyclic acid and cyclic urea formation via Co-catalysed oxidative carbonylation of, 41
Cu-catalysed dehydroamination of 1-hexanol with dimethylamine: *in situ* FTIR study, 399
preparation, characterization and catalytic activity of polymer supported trimethylenediamine–Ru complex, 141
shape-selective mordenite-catalysed amination of ethanolamine to ethylenediamine, 11
syntheses of new chiral ferrocenylamine sulphide and selenide complexes of Group X metals and their application to enantioselective cross-coupling reactions and selective hydrogenation, 331
Aromatic compounds
benzene boronic acid inhibition of vitamin A–bile-salt-stimulated human milk lipase interactions, 255
catalytic activity of Fe and Co phthalocyanines wrapped in poly(peptide) for autoxidation of thiol, 127
inverse phase-transfer effect of cyclodextrins: oxidation reaction of benzyl alcohols by NaClO aqueous solution, L13
metal carbonyl catalysed reductive carbonylation of substituted nitrobenzenes in presence of alkenes as solvents, 155
Ni catalysed cross-coupling reactions of Grignard reagents with di-, tri- and polychlorobiphenyls, 343
oligomerization of alkynes by $RhCl_2$–Aliquat 336 catalyst system:
formation of benzene derivatives, 313
formation of 2,3-disubstituted 1-phenylnaphthalenes by cyclodimerization of phenylalkynes, 323
Pd(0)-catalysed carboxylative cyclized coupling of propargylic alcohol with aryl halides, L1
primary amines; acyclic acid and cyclic urea formation via Co-catalysed oxidative carbonylation of, 41
Asymmetric reactions
homogeneous and heterogeneous catalytic: new investigations concerning preparation of reproducible MRNi catalyst, 1
Autoxidation
catalytic activity of Fe and Co phthalocyanines wrapped in poly(peptide) for, of thiol, 127

Bile salt
benzene boronic acid inhibition of vitamin A–bile-salt-stimulated human milk lipase interactions, 255
Bond shift rearrangements
mechanism of 1,2-bond shift rearrangements of paraffins on transition metal catalysts: free radicals in heterogeneous catalysis, L29

Caesium
reaction behaviour in metathesis of alkenes with alkyl-substituted vinylene structure over $CsNO_3$–Re_2O_7–Al_2O_3 catalyst, 209
Carbonaceous deposits
and effect of particle size; hydrogenation of acetylene over various Group VIII metals, 99
Carbon dioxide
and CO; preparation, characterization and reactivity of novel heterogeneous catalyst for reduction of, 239
Carbon monoxide
and CO_2; preparation, characterization and reactivity of novel heterogeneous catalyst for reduction of, 239
hydrogenation of, over ZrO_2-supported Rh catalysts: kinetic aspects, 283
Carbonylation
allylic and vinylic, of cyclohexene catalysed by [Ru^{II}(EDTA—H)-(CO)], 275
Co-catalysed oxidative; acyclic acid and cyclic urea formation via, of aromatic primary amines, 41
and dehydrogenation: remarkable difference in wavelength dependence between, of C—H bond catalysed by $RhCl(CO)(PMe_3)_2$; excimer laser-induced homogeneous catalysis, L9
metal carbonyl catalysed reductive, of substituted nitrobenzenes in presence of alkenes as solvents, 155
Chromium
$Mo(CO)_6$ adsorption on chromia–

silica catalyst: formation of hetero-adduct metal complexes, 71
Raman spectra of Cr oxide species in CrO_3/Al_2O_3 catalysts, 83
Cobalt
acyclic acid and cyclic urea formation via Co-catalysed oxidative carbonylation of aromatic primary amines, 41
catalytic activity of Fe and Co phthalocyanines wrapped in poly(peptide) for autoxidation of thiol, 127
deuterioformylation of (*E*)-2-butene and protioformylation of (*E*)-1,1,1-$^2H_3$-2-butene with Co, Rh and Pt catalysts, 363
Copper
Cu-catalysed dehydroamination of 1-hexanol with dimethylamine: *in situ* FTIR study, 399
selectivity dependence on acidity of Cu–alumina catalysts in dehydrogenation of cyclohexanol, L23
Coupling
Ni catalysed cross-coupling reactions of Grignard reagents with di-, tri- and polychlorobiphenyls, 343
Pd(0)-catalysed carboxylative cyclized coupling of propargylic alcohol with aryl halides, L1
syntheses of new chiral ferrocenylamine sulphide and selenide complexes of Group X metals and their application to enantioselective cross-coupling reactions and selective hydrogenation, 331
Cyclodextrins
inverse phase-transfer effect of: oxidation reaction of benzyl alcohols by NaClO aqueous solution, L13

Dehydroamination
Cu-catalysed, of 1-hexanol with dimethylamine: *in situ* FTIR study, 399
Dehydrogenation
and carbonylation: remarkable difference in wavelength dependence between, of C—H bond catalysed by $RhCl(CO)(PMe_3)_2$; excimer laser-induced homogeneous catalysis, L9
and oxidation of alcohols by glauconite, a natural Fe(II)- and Fe(III)-containing sheet silicate, and ferrisepiolite, its molecular sieve analogue, 109
selectivity dependence on acidity of Cu–alumina catalysts in, of cyclohexanol, L23
Deuterioformylation
of (*E*)-2-butene and protioformylation of (*E*)-1,1,1-$^2H_3$-2-butene with Co, Rh and Pt catalysts, 363
Diels–Alder additions
of 1,3-dienes to propargylic alcohols catalysed by Wilkinson's catalyst, 59

Esters
selective methyl formate homologation into methyl acetate catalysed by Rh complexes, L15

GC pulse techniques
evaluation of sorbate/reactant shape-selectivity of zeolites by, 173
Glycollic acid
and mandelic acid; mechanism of Ru(III)-catalysed oxidation of, with *N*-bromosuccinimide in acidic media, 49
Grignard reagents
Ni catalysed cross-coupling reactions of, with di-, tri- and polychlorobiphenyls, 343

Hetero-adduct metal complexes
formation of; $Mo(CO)_6$ adsorption on chromia–silica catalyst, 71
Heteropolyacids
solid, and $H_3PW_{12}O_{40}$ supported on SiO_2; ^1H and ^{31}P MAS NMR studies, 65
Homologation
selective methyl formate, into methyl acetate catalysed by Rh complexes, L15
Hydrogels
transition metal ions supported on, as hydrogenation catalysts, 189
Hydrogen
^1H and ^{31}P MAS NMR studies of solid heteropolyacids and $H_3PW_{12}O_{40}$ supported on SiO_2, 65
and isocyanides: hydroiminoformylation of olefins with, in presence of Ru complex catalysts, L5
Hydrogenation
of acetylene over various Group VIII metals: effect of particle size and carbonaceous deposits, 99

catalysts; transition metal ions supported on hydrogels as, 189
of CO over ZrO_2-supported Rh catalysts: kinetic aspects, 283
properties of homogeneous and heterogeneous Re catalysts in, of nitro compounds, 165
syntheses of new chiral ferrocenylamine sulphide and selenide complexes of Group X metals and their application to enantioselective cross-coupling reactions and selective hydrogenation, 331
Hydroiminoformylation
of olefins with isocyanides and hydrogen in presence of Ru complex catalysts, L5
Hydrophobic thiol
polyelectrolyte-promoted catalytic oxidation of, 351

Iron
catalytic activity of Fe and Co phthalocyanines wrapped in poly(peptide) for autoxidation of thiol, 127
oxidation and dehydrogenation of alcohols by glauconite, a natural Fe(II)- and Fe(III)-containing sheet silicate, and ferrisepiolite, its molecular sieve analogue, 109
syntheses of new chiral ferrocenylamine sulphide and selenide complexes of Group X metals and their application to enantioselective cross-coupling reactions and selective hydrogenation, 331
Isocyanides
and H: hydroiminoformylation of olefins with, in presence of Ru complex catalysts, L5
Isomerization
substituent effects on, of 1,5-hexadiene catalysed by ring-substituted titanocene hydride: organotitanium chemistry, 19

Laser
excimer laser-induced homogeneous catalysis: remarkable difference in wavelength dependence between carbonylation and dehydrogenation of C—H bond catalysed by RhCl(CO)$(PMe_3)_2$, L9
Lipase
benzene boronic acid inhibition of vitamin A–bile-salt-stimulated human milk lipase interactions, 255

Mandelic acid
and glycollic acid; mechanism of Ru(III)-catalysed oxidation of, with *N*-bromosuccinimide in acidic media, 49
Metathesis
reaction behaviour in, of alkenes with alkyl-substituted vinylene structure over $CsNO_3$–Re_2O_7–Al_2O_3 catalyst, 209
Molybdenum
$Mo(CO)_6$ adsorption on chromia–silica catalyst: formation of heteroadduct metal complexes, 71
molybdena on silica catalysts: selective catalytic oxidation of ammonia to N over MoO_3 on SiO_2 catalysts, 229
photocatalytic oxygenation of α-pinene with molecular oxygen activated by Nb and Mo porphyrins: photocatalytic systems, 267
Mordenite-catalysed amination
shape-selective, of ethanolamine to ethylenediamine, 11

Nickel
homogeneous and heterogeneous catalytic asymmetric reactions: new investigations concerning preparation of reproducible MRNi catalyst, 1
Ni catalysed cross-coupling reactions of Grignard reagents with di-, tri- and polychlorobiphenyls, 343
Niobium
photocatalytic oxygenation of α-pinene with molecular oxygen activated by Nb and Mo porphyrins: photocatalytic systems, 267
Nitro compounds
metal carbonyl catalysed reductive carbonylation of substituted nitrobenzenes in presence of alkenes as solvents, 155
molybdena on silica catalysts: selective catalytic oxidation of ammonia to N over MoO_3 on SiO_2 catalysts, 229
properties of homogeneous and heterogenous Re catalysts in hydrogenation of, 165

Olefins: see Alkenes
Oligomerization
of alkynes by $RhCl_2$–Aliquat 336 catalyst system:
formation of benzene derivatives, 313
formation of 2,3-disubstituted 1-phenylnaphthalenes by cyclodimerization of phenylalkynes, 323
Oxidation
and dehydrogenation of alcohols by glauconite, a natural Fe(II)- and Fe(III)-containing sheet silicate, and ferrisepiolite, its molecular sieve analogue, 109
kinetic resolution of 1,2-diols by baker's yeast oxidation, L33
mass spectrometric characterization of performance of low-temperature oxidation catalyst, 389
polyelectrolyte-promoted catalytic, of hydrophobic thiol, 351
reaction of benzyl alcohols by NaClO aqueous solution; inverse phase-transfer effect of cyclodextrins, L13
Ru(III)-catalysed, of glycollic and mandelic acids with *N*-bromosuccinimide in acidic media; mechanism of, 49
selective catalytic, of ammonia to N over MoO_3 on SiO_2 catalysts; molybdena on silica catalysts, 229
supported Pd oxide as catalyst for, of water, 31
Oxygenation
photocatalytic, of α-pinene with molecular oxygen activated by Nb and Mo porphyrins: photocatalytic systems, 267

Palladium
Pd(0)-catalysed carboxylative cyclized coupling of propargylic alcohol with aryl halides, L1
supported Pd oxide as catalyst for oxidation of water, 31
Paraffins
mechanism of 1,2-bond shift rearrangements of, on transition metal catalysts: free radicals in heterogeneous catalysis, L29
Phosphorus
decomposition of organophosphorus compounds on photoactivated TiO_2 surfaces, 375
excimer laser-induced homogeneous catalysis: remarkable difference in wavelength dependence between carbonylation and dehydrogenation of C—H bond catalysed by $RhCl(CO)(PMe_3)_2$, L9
^1H and ^{31}P MAS NMR studies of solid heteropolyacids and $H_3PW_{12}O_{40}$ supported on SiO_2, 65
Photoactivation
decomposition of organophosphorus compounds on photoactivated TiO_2 surfaces, 375
Photocatalytic oxygenation
of α-pinene with molecular oxygen activated by Nb and Mo porphyrins: photocatalytic systems, 267
Photochemical degradation
primary step in, of acetic acid and chloroacetic acids on TiO_2 photocatalyst, 295
Pinene
α-; photocatalytic oxygenation of, with molecular oxygen activated by Nb and Mo porphyrins: photocatalytic systems, 267
Platinum
deuterioformylation of (*E*)-2-butene and protioformylation of (*E*)-1,1,1-$^2H_3$-2-butene with Co, Rh and Pt catalysts, 363
Polymer
preparation, characterization and catalytic activity of polymer-supported trimethylenediamine–Ru complex, 141
Poly(peptide)
catalytic activity of Fe and Co phthalocyanines wrapped in, for autoxidation of thiol, 127

Reduction
preparation, characterization and reactivity of novel heterogeneous catalyst for, of CO and CO_2, 239
Rhenium
properties of homogeneous and heterogeneous Re catalysts in hydrogenation of nitro compounds, 165
reaction behaviour in metathesis of alkenes with alkyl-substituted vinylene structure over $CsNO_3$–Re_2O_7–Al_2O_3 catalyst, 209
Rhodium
deuterioformylation of (*E*)-2-butene

and protioformylation of (*E*)-1,1,1-$^2H_3$-2-butene with Co, Rh and Pt catalysts, 363
excimer laser-induced homogeneous catalysis: remarkable difference in wavelength dependence between carbonylation and dehydrogenation of C—H bond catalysed by RhCl(CO)(PMe_3)$_2$, L9
hydrogenation of CO over ZrO_2-supported Rh catalysts: kinetic aspects, 283
oligomerization of alkynes by $RhCl_2$–Aliquat 336 catalyst system: formation of benzene derivatives, 313
formation of 2,3-disubstituted 1-phenylnaphthalenes by cyclodimerization of phenylalkynes, 323
selective methyl formate homologation into methyl acetate catalysed by Rh complexes, L15
Ruthenium
allylic and vinylic carbonylation of cyclohexene catalysed by [Ru^{II}(EDTA—H)(CO)], 275
hydroiminoformylation of olefins with isocyanides and H in presence of Ru complex catalysts, L5
mechanism of Ru(III)-catalysed oxidation of glycollic and mandelic acids with *N*-bromosuccinimide in acidic media, 49
preparation, characterization and catalytic activity of polymer-supported trimethylenediamine–Ru complex, 141

Selenide complexes
syntheses of new chiral ferrocenylamine sulphide and selenide complexes of Group X metals and their application to enantioselective cross-coupling reactions and selective hydrogenation, 331
Shape-selectivity
evaluation of sorbate/reactant shape-selectivity of zeolites by GC pulse techniques, 173
shape-selective mordenite-catalysed amination of ethanolamine to ethylenediamine, 11
Silicon
^1H and ^{31}P MAS NMR studies of solid heteropolyacids and $H_3PW_{12}O_{40}$ supported on SiO_2, 65
influence of carrier (Al_2O_3 and SiO_2) calcination temperature on physicochemical and catalytic properties of supported Ti complexes, 221
$Mo(CO)_6$ adsorption on chromia–silica catalyst: formation of heteroadduct metal complexes, 71
molybdena on silica catalysts: selective catalytic oxidation of ammonia to N over MoO_3 on SiO_2 catalysts, 229
oxidation and dehydrogenation of alcohols by glauconite, a natural Fe(II)- and Fe(III)-containing sheet silicate, and ferrisepiolite, its molecular sieve analogue, 109
Sodium
inverse phase-transfer effect of cyclodextrins: oxidation reaction of benzyl alcohols by NaClO aqueous solution, L13
Sorbate
evaluation of sorbate/reactant shape-selectivity of zeolites by GC pulse techniques, 173
Spectroscopy
Cu-catalysed dehydroamination of 1-hexanol with dimethylamine: *in situ* FTIR study, 399
^1H and ^{31}P MAS NMR studies of solid heteropolyacids and $H_3PW_{12}O_{40}$ supported on SiO_2, 65
mass spectrometric characterization of performance of low-temperature oxidation catalyst, 389
Raman spectra of Cr oxide species in CrO_3/Al_2O_3 catalysts, 83
Succinimide
N-bromo-: mechanism of Ru(III)- catalysed oxidation of glycollic and mandelic acids with, in acidic media, 49
Sulphur
catalytic activity of Fe and Co phthalocyanines wrapped in poly(peptide) for autoxidation of thiol, 127
polyelectrolyte-promoted catalytic oxidation of hydrophobic thiol, 351
syntheses of new chiral ferrocenylamine sulphide and selenide complexes of Group X metals and their application to enantioselective cross-coupling reactions and selective hydrogenation, 331

Titanium
decomposition of organophosphorus compounds on photoactivated TiO_2 surfaces, 375
influence of carrier (Al_2O_3 and SiO_2) calcination temperature on physicochemical and catalytic properties of supported Ti complexes, 221
organotitanium chemistry: substituent effects on isomerization of 1,5-hexadiene catalysed by ring-substituted titanocene hydride, 19
primary step in photochemical degradation of acetic acid and chloroacetic acids on TiO_2 photocatalyst, 295
Transition metal ions
supported on hydrogels as hydrogenation catalysts, 189

Urea
acyclic acid and cyclic urea formation via Co-catalysed oxidative carbonylation of aromatic primary amines, 41

Vinylene
reaction behaviour in metathesis of alkenes with alkyl-substituted vinylene structure over $CsNO_3$–Re_2O_7–Al_2O_3 catalyst, 209
Vinylic carbonylation
and allylic carbonylation of cyclohexene catalysed by [Ru^{II}(EDTA—H)(CO)], 275
Vitamin A
benzene boronic acid inhibition of vitamin A–bile-salt-stimulated human milk lipase interactions, 255

Water
supported Pd oxide as catalyst for oxidation of, 31
Wilkinson's catalyst
Diels–Alder additions of 1,3-dienes to propargylic alcohols catalysed by, 59

Yeast
kinetic resolution of 1,2-diols by baker's yeast oxidation, L33

Zeolites
evaluation of sorbate/reactant shape-selectivity of, by GC pulse techniques, 173
Zirconium
hydrogenation of CO over ZrO_2-supported Rh catalysts: kinetic aspects, 283
